The Spirit of the Policy:

1.1 Road Safety and Aesthetics:

the potential for conflicts with traffic safety is highest. It also requires to consider the location, design, size or type of sign along the routes, where hoardings and it is for this reason that the outdoor advertising policy require The policy is based upon a careful review of studies on the safety of

enforcement measures to ensure that structures adhere to these stipulations. The policy is based on the fact that while outdoor advertisements

bring revenue to the city, it must be driven by considerations of safety and

Working for City Aesthetics :

primarily in parts of the city, which are commercial in nature : business, The policy is premised on the basis that advertisements are promoted

follows-Guiding principles: Outdoor Advertising Policy 2010: The guiding principles of the Outdoor Advertising Policy are as

its aesthetics. they support the city's public service development and enhance are permitted only if they are not a road safety hazard or if in its implementation, it will be clear that outdoor hoardings imperatives, but by city development imperatives. Therefore, The policy for outdoor advertising is driven, not by revenue

the city. boards and in restricting large bill-boards to select areas of This will be done by increasing the space between the bill The policy will explicitly work to discourage visual clutter.

2

General Permission Criteria for Advertising Devices:

Outdoor Advertising and Traffic Efficiency:

and traffic efficiency is assured. intended to ensure that a high level of safety for road users is maintained The permission criteria for the display of advertising devices are

An advertising device may be considered a traffic hazard—

- If it interferes with road safety or traffic efficiency.
- If it interferes with the effectiveness of a traffic control device.

No. 31-3] The J&K Govt. Gazette, 30th Oct., 2010/8th Kar.,

- If it distracts, obscures the drivers view.
- pedestrians, cyclists or other road users? Is a dangerous obstruction to road or other infrastructure, traffic,
- effect of those devices may be potentially hazardous. Is in an area where there are several devices and the cumulative

on its size, location, luminance and background. The hazard generally diminishes, the further the device is away from the road. The traffic hazard potential of an advertising device varies depending

Policy, 2010:-The advertisement devices have been categorized as per the

Category 1: billboards/unipoles and bridge and flyover panels; Large-format advertisements, mainly fixed on

Category 2: Advertisements mounted on public amenities, like public toilets, garbage collection points etc.;

Category 3: Category 4: Advertisement devices for self-advertising in Fleets and transport related infrastructure;

commercial areas.

minimize the level of driver distraction. The application of control on physical characteristics is intended to

Control of the physical characteristics of advertising devices shall be

as follows:

- Advertising Devices shall not use shapes that could potentially result in an Advertising Device being mistaken for an official traffic sign.
- appearance of an emergency service. light sources which, when viewed from the road, could give the Advertising shall not contain flashing red, blue or amber point

- Surroundings. directed solely on the Advertising Device and its immediate All lighting associated with the Advertising Device shall be
- external 'spot' light sources are not directed at approaching External illumination sources shall be shielded to ensure that
- Illumination of Advertising Device is to be concealed or be integral
- beyond the Advertising Device, Any light source shall be shielded so that glare does not extend
- (not motorists) are excluded but this should not be displayed by where messages are directed at, and intended for, pedestrians any commercial agency/advertising source. Variable message displays located at bus stops or similar places message displays used by road authorities for traffic management. This permission criterion is not intended to apply to variable

Content Criteria for Outdoor Advertisement:

4.2

Advertisements) or that otherwise causes a traffic hazard. the Advertising Industry's Code of Ethics, (refer List of Negative take action to modify or remove any Advertising Device that contravene The policy will be based upon self-regulatory controls and JMC shall

List of Negative Advertisements:

- Advertisement Containing Nudity.
- community or ethnic differences. Racial advertisements or advertisements propagating caste,
- Advertisement promoting drugs, alcohol, cigarette or tobacco
- Advertisements propagating exploitation of women or child.

- No. 31-3] The J&K Govt. Gazette, 30th Oct., 2010/8th Kart., 1932.
- Advertisement having sexual overtone.
- Advertisement depicting cruelty to animals
- Advertisement depicting any nation or institution in poor light.
- Advertisement casting aspersion of any brand or person.
- Advertisement banned by the Advertisement Council of India or
- Advertisement glorifying violence.
- Destructive devices and explosives depicting items
- Advertisement of Weapons and related items (such as firearms, lirearm parts and magazines, ammunition etc.).
- threatening or unlawfully harassing. Advertisements which may be defamatory, unlawfully
- meaning of the Indecent Representation of Women (Prohibition) or contain an "indecent representation of women" within the Advertisements which may be obscene or contain pomography
- Penal Code, 1860; or Remedies (Objectionable Advertisements) Act, 1954, the Indian to the Drugs and Cosmetics Act, 1940, the Drugs and Magic applicable law for the time being in force, including but not limited of items, goods or services that are prohibited under any Advertisement linked directly or indirectly to or include description
- Any other items considered inappropriate by the municipal bodies

Device face should be easily discernible to travelling motorists. This will devices which are directed at pedestrians), text elements on an Advertising For all categories of devices (except Category 3 and some Category 4

The content or graphic layout exhibited on advertising device panel shall avoid hard-to-read and overlay intricate typefaces and have letters styles that are appropriate. Under no circumstances should device contain information in text sizes, which would necessitate the driver or passenger in a moving vehicle to stop, read and/or note down, which is detrimental to the smooth flow of traffic and distracting for the driver.

All signs shall be so designed as to maintain a proportion where, as a general rule, letters should not appear to occupy more than 20% of the signage area, unless otherwise permitted by the JMC.

3 Structure Criteria for Outdoor Advertising:

Advertising Device structures including the foundations, for categories I and 2 devices, shall be designed and checked for extreme wind conditions, extreme rainfall, earthquakes, soil bearing capacity etc. and shall comply with relevant Indian structural design standards, codes of practice and the policy guidelines. The designs shall be certified by an experienced and practicing structural engineer and shall be submitted to the JMC before start of work at the site.

The supporting structure shall have a non-reflective finish to prevent glare.

The device structure shall be well maintained at all times. It shall be painted in colours that are consistent with, and enhance the surrounding area and will be compliant with the criteria for colours laid out earlier in this policy.

Official road furniture such as official signs and delineator guide-posts shall not be used as the supporting structure of an Advertising Device.

The name of the Advertising Device license holder should be placed in a conspicuous position on the device.

4.4 Outdoor advertising devices and electrical connection

The electrical connections and components in all Advertising Devices shall be in accordance with relevant Indian Standards and designed to ensure that there is no safety or traffic risk. A copy of the electrical contractor's test certificate shall be provided to the Department.

No generator running on diesel/petrol/kerosene or any bio fuel, causing noise, air or water pollution would be allowed for providing power for illumination of any outdoor Advertising Device.

4.5 Conservation Areas for Outdoor Advertising

There are certain areas where advertising may be inappropriate due to the nature of the surrounding area. Under this policy advertising will not be allowed in the following areas:—

- National Parks/Sanctuaries, Forests etc.
- Historical monuments, cremation grounds, graveyards etc.
- Heritage areas
- All religious places, like Temple, Mosque, Church and Gurudwara etc.
- Educational Institutions.

Exceptions to the above restrictions may apply in special circumstances. For example for tourist service/accommodation businesses, advertising devices may be permitted as part of a regional tourist plan.

In rare and exceptional circumstances, applications would be considered on a case-by-case basis by the JMC.
